Professional Profile

Master's student in Cyber Security with strong foundations in Python, Machine Learning, Computer Vision, and engineering systems. Passionate about information security, vulnerability assessment, network protection, and intelligent threat detection. Strong analytical background built through engineering studies, technical project leadership, and scientific problem-solving.

Technical Skills

- **Cybersecurity:** Network Security, Vulnerability Assessment, Risk Analysis, Information Systems Protection
- **Programming:** Python, SQL, Scripting, Octave
- **Artificial Intelligence:** Supervised Learning, Regression, Classification, Predictive Modeling
- **Computer Vision:** OpenCV, Image Processing, Feature Extraction, Detection Fundamentals
- **Tools:** LaTeX, AutoCAD, ProfiCAD, MS Excel, Word, PowerPoint
- **Systems:** Linux fundamentals, automation, technical troubleshooting

Education

Master's in Cyber Security AIMS Senegal	2025 – Present
Bachelor's Degree in Engineering Université Catholique La Sapiencia de Goma(UCS-Goma)	2019 – 2023
Associate Degree in Industrial Electricity Institut Technique Industriel de Goma (ITIG/Don Bosco)	2013 – 2019

Certification

Supervised Machine Learning: Regression and Classification

DeepLearning.AI and Stanford University – Coursera

Completed: December 22, 2025

Professional Experience

Cyber Security Master's Student AIMS Senegal	2025 – Present
• Training in cybersecurity, systems security, and advanced analytical methods • Exposure to network defense, threat analysis, and security-oriented programming	
Project Manager and Head of Engineering Department Goma Technologies (GOTECH, Goma)	2019 – 2025

- Led design and development of industrial bakery ovens and automated mixers
- Supervised electrical and mechanical system design
- Managed implementation phases and technical project coordination
- Developed strong systems-analysis and risk-management skills transferable to cybersecurity

Electrical Engineering Teacher

Sept 2023 – Sept 2025

Complexe Scolaire La Divinité (COSDI/Goma)

- Delivered courses in electrical systems, machine principles, and schematic design

Office Computing Instructor

Sept 2024 – Sept 2025

Second Genealogy

- Trained learners in digital tools, internet usage, and computer fundamentals

Relevant Projects

- Machine Learning models for regression and classification in Python
- Computer Vision projects using Python and OpenCV
- Technical simulations and data analysis projects
- Design and automation of industrial electrical systems
- Intelligent system modeling and predictive analysis

Languages

French (Advanced), English (Intermediate), Swahili (Fluent), Lingala (Beginner)

Interests

Cybersecurity, Programming, Mathematics, Scientific Research, Technical Writing

Hobbies

Football, Volleyball, Ping-Pong, Cinema, Writing, Singing
